

**Local Interagency Planning Teams** bring together child-serving organizations and community resources to locally serve children and families across Georgia.

Georgia has hundreds of Local Interagency Planning Teams that work across sectors and organizations to:

**IMPROVE** **coordination of services for children living with or at risk for behavioral health challenges**

**CREATE** **care plans that are followed and adjusted as needed**

**REDUCE** **duplication of services**

**ENSURE** **children and families have access to appropriate, high-quality, community-based care**
